

Development, Settlement, Health & Sustainability in Global Cities: The Shanghai Experience

GEOG 3000/SOCY 2090 & URBS 3050/LBST 2102 (6 total credit hours) | Summer 1, 2017

Month long interdisciplinary course using **Shanghai, China as “living laboratory”** through which to explore multiple dimensions of urbanization in context of globalization.

Live and study on central campus of **East China Normal University** in heart of Shanghai.

Field, classroom, community and lab-based instruction.

Faculty team affiliated with UNCC’s **Levine Scholars , Geography & Earth Sciences, Sociology, Urban Studies Programs** and with ECNU’s **Global Institute for Urban and Regional Sustainability.**

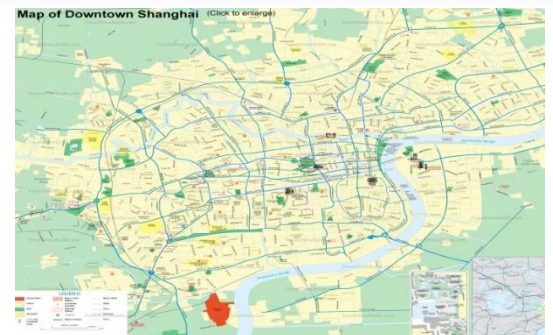

Earn required Liberal Studies credits while studying abroad

Four areas of exploration:

- **Urban Change, Development and Planning**
- **Urban Population, Migration and Settlement**
- **Social Construction of Health and Wellbeing in an Urban Context**
- **Urban Environmental Challenge and Sustainability**

Excursions, community outreach, laboratory, independent research opportunities incorporated into instruction and assessment.

Information about cost and deadlines available shortly from UNC Charlotte’s Office of Education Abroad (edabroad.uncc.edu)
